Subject: r/pet Thermoforming Line – Rexdale Operations

We are pleased to announce the addition of r/pet thermoforming production at our Rexdale (Toronto) facility. These lines are in addition to our existing r/pet production facility in Delta, British Columbia.

With this new line, CKF Inc. is now very well positioned to service our r/pet North American partners, at the high level that they have come to expect and have enjoyed through our EPS facilities, in both locations.

For our Eastern customers, we will be shipping directly from our Rexdale operations, allowing you the option to combine your r/pet order with foam and/or Earthcycle skus.

Your CKF inc. Territory Manager will be glad to discuss our complete line of r/pet solutions with you.

Sincerely,

Brad Dennis
Vice President Sales and Marketing
